

INFERNO STROBE-10

LIGHT BARRIER DATA SHEET

⇒ significantly reduces costs of intrusions by limiting the intruders' time inside.

⇒ generates a irregular flash pattern of such intensity that it temporarily destroys one's vision

⇒ induces "sensory overload" when operated simultaneously with a sound barrier

⇒ compatible with all existing alarm systems, simple to retrofit and install

⇒ destabilizes & disorients the intruder

An Inferno light barrier greatly magnifies the disruptive and destabilizing effect of an Inferno sound barrier. It is not sufficiently disruptive as a stand-alone device, however when operated simultaneously with a sound barrier, the resultant effect is sensory overload. Like a sound barrier, it is typically deployed in situations where conventional security equipment has/will fail to provide sufficient protection. The intruder depends on the "window of opportunity" that exists between detection and arrival of security personnel. The horrendous combined effect of the sound & light barrier destroys this window and with it, the intruder's ability to inflict damage and loss.

The Strobe 10 is essentially a less powerful version of its big brother, the Strobe 16. One key advantage that the Strobe 10 has over the Strobe 16, is that the flash pattern is highly irregular - making it significantly more disruptive. It is designed to protect smaller areas, its lower wattage bulb only requiring a 10A fuse.

The powerful 1,500W bulb is capable of temporarily "burning" a white spot into the intruder's vision, making it extremely difficult to see. Most effective in darkened environments, the strobe disorients and destabilizes the intruder who will struggle to focus, orient and navigate within the protected area. Unlike the sound barriers, the Strobe 10 requires mains power.

TECHNICAL SUMMARY

| | |
|--------------------|------------------------|
| Flash frequency | 7-12/second, irregular |
| Dimensions: (mm) | 620 x 240 x 200 |
| Weight: | 5kg |
| Power consumption: | 230V, 50/60Hz |
| Wattage: | 1,500W |
| Fuse: | 10A |

SONIC SECURITY™

Forcing the intruder to exit immediately, empty-handed and without confrontation, is the ultimate solution in any intrusion.

Inferno - intolerable to intruders.
