

INFERNO WIRELESS SYSTEM

STAND-ALONE SYSTEM : DATA SHEET

⇒ renders the protected area uninhabitable & forces intruders to retreat immediately.

⇒ significantly reduces costs of intrusions by limiting the intruders' time inside.

⇒ generates an utterly intolerable sound spectrum, broadcast at 125dB.

⇒ is armed/disarmed via remote, and provides notification via SMS, of activation & status.

⇒ a stand-alone system that operates without the existence of a conventional alarm system.

⇒ does not require mains power.

⇒ ideally suited to mobile/temporary installations.

⇒ ultra-high Swedish quality & durability.

The sound barrier emits an audible chirp upon arming/disarming to indicate its status. Requiring only a 12V feed to maintain the internal battery, it can operate without mains power for months when

connected to a suitable 12V battery. It is capable of protecting up to 70m² - larger areas can be protected by several units.

The Inferno Wireless System consists of an Intenso sound barrier, an SMS communication module, an infra-red motion detector and two remote control units for arming/disarming. By combining the security of a monitored system with the power of the Inferno sound barrier, a very high level of security & protection is now available in situations where neither was previously available.

The Wireless System is a highly effective solution for a large array of installations, from temporary storage spaces/offices to cargo vehicles, storage sheds to insecure and/or remote locations. Once the sound barrier's internal battery is charged, the system can be armed via remote, and can in fact operate for up to 2 days without any external power supply whatsoever.

SONIC SECURITY™

TECHNICAL SUMMARY

Protective capability:	Up to 70m ²
Dimensions: (mm)	685 x 106 x 40
Weight:	1.7kg
Frequency range:	2 - 5kHz
Acoustic effect:	125 - 127dB (A)
Battery backup:	9.6V, 1800mAh, Ni-MH
Battery lifetime:	3 years
Power consumption:	12-16V DC, <150mA
Runtime:	> 30 minutes
Temperature range:	-10 to +60°C

The cost of an intrusion is directly proportional to the time available to the intruder. Forcing the intruder to exit immediately, empty-handed and without confrontation, is the ultimate solution in any intrusion.

Inferno - intolerable to intruders.
